Professional Summary

Data Engineer with hands-on experience building REST API integrations for finance systems with IBM API Connect. Built a Snowflake, Airflow and dbt pipeline on AWS that loads 3 API sources and a 50,000-row ledger into a Power BI DirectQuery dashboard. Certified Associate Data Engineer (DataCamp).

Skills

Programming: Python (Pandas, pytest), SQL

Data engineering: Apache Airflow, dbt, Snowflake, AWS (EC2), Azure Blob Storage, Docker, Git, GitHub Actions (CI/CD)

Integration: REST APIs, IBM API Connect, OutSystems

Analytics and BI: Power BI (Power Query, DAX), Streamlit, web scraping, data cleaning

Education

Bachelor of Computer Science | Qassim University, Al Qasim, Saudi Arabia | Sep 2019 - May 2024 | GPA 4.5 / 5 |

Coursework: Database Systems, Data Structures, Algorithms, Machine Learning, Artificial Intelligence

Projects

InvaSight, Investment Portfolio Insights Pipeline | SDA capstone, team of 4, Sep 2026

- Owned the end-to-end pipeline, from multi-source ingestion to a Power BI DirectQuery dashboard.
- Loaded FX, metals and equities APIs plus a synthetic 50,000-row transactions ledger into a SAR-denominated star schema in Snowflake, staged through Azure Blob Storage.
- Orchestrated with Airflow (a daily API-extract DAG and a 45-minute ledger DAG) with task dependencies so one failed step stops the steps that depend on it; added dbt tests, pytest, Docker and GitHub Actions CI/CD on AWS.
- Restored the full dbt project from Snowflake query history one day before delivery, after 3 unauthorized logins on the EC2 server and deleted files.

Esports World Cup 2024 Dashboard | Power BI, Python

- Scraped saved Liquipedia pages with Python and cleaned data on 1,500+ players, 200+ teams and 20+ games, then built the Power BI dashboard with Power Query and DAX measures; found and corrected counting errors in the source site's figures.

Professional Experience

Software Developer (Integrations) | Ejada, Buraydah, Saudi Arabia | Feb 2025 - Jul 2025

- Built and maintained inbound and outbound REST API integrations for finance systems with IBM API Connect and OutSystems.
- Tested integrations and fixed the issues found before releasing them from development to production.

Data Analyst and BI Developer | Freelance, Remote, Saudi Arabia | Sep 2025 - Present

- Delivered 2 Power BI dashboards for 2 clients, turning their business questions into KPIs they could track.

Data Analyst | Hackathonat, Remote, Saudi Arabia | Jul 2023 - Aug 2023, Apr 2024 - May 2024

- Built 3 dashboards end to end for hackathon ideas: web scraping, data cleaning with Power Query and visualization in Power BI and Python.
- Wrote a Python tool on X's Engagement API that filters tweets, analyzes engagement metrics and generates charts and an insights report.

Private Tutor | Data Structures and Statistics tutor for Qassim University students, Aug 2021 - Jan 2025

Co-Founder | TechVerse, tech community that runs tech talks and bootcamps | Aug 2022 - Present

Certifications

Data Engineering Bootcamp, Saudi Digital Academy (SDA), 7 weeks | Sep 2026

Associate Data Engineer, DataCamp | Aug 2024 | Google Data Analytics, Google | Aug 2024
